

FEATURES

Dual Sliding Rail System:	Allows the motor to easily glide across the workpiece
Fined Tooth Blade:	Provides a clean smooth edge
Fully Adjustable Clamp and Mitre Rip Guide:	Provides excellent support to the workpiece
Low Centre of Gravity Design:	Offers a stable support surface to perform both cross and rip cuts
Adjustable Centre of Blade Indicator:	Allows for extremely accurate cutting
Adjustable side fence:	Locks into place for repetitive cuts
Innovative Design:	Suitable for cutting other materials such as architraves, skirting boards and similar sized materials

STANDARD EQUIPMENT

Mitre Guage
Material Clamps
Push Stick

SPECIFICATIONS

Input Power:	860W (6A)
No Load Speed:	11000 min ⁻¹
Blade Size:	125mm (5")
Blade Bore:	17mm
Table Size:	660mm (26") x 345mm (13 ½")
Parallel Rip Cut:	0 - 120mm (4 ¾")
Max Cross Cut:	430mm (17")
Max Depth of Cut:	18mm (23/32")
Mitre Cut:	±10° micro, 15°, 20°, 30°, 45° macro
Weight:	8.4Kg (18.5lbs)
