Description

Set of four, 600 x 600mm, recessed LED panels. 3D sky imagery ideal for illuminating areas that don't have any natural light.

Some of the benefits of choosing an LED SKY CEILING include:

- An improved mood from use of light that mimics natural light.
- Alleviation of anxiety and stress due to the sense of outdoors.
- Catching the attention of visitors with a unique design feature.

By simulating daylight with the right LED panels and using realistic, high-resolution pictures, you will feel as if you are outside under a blue sky. The colour hue of the LED panels matches with that of real daylight to give the impression of looking through a window.

These 3D panels are suitable for domestic or commercial spaces such as places of education, healthcare sectors, waiting rooms or sensory rooms, the applications to this amazing revolutionary light panel is endless.
