

PRODUCT DATA SHEET

TDXCEL COUNTERSINK PROFILER CONE (2MM - 38MM)

The Mexco Countersink Profiler Cone is specifically designed to enlarge, shape, and refine existing holes made in porcelain, ceramic, marble and granite materials. Perfect for smoothing and polishing rough edges, it offers the precision you need for professional results.

The Countersink Profiler Cone is **NOT** intended for drilling new holes. The universal M14 threaded connection allows use with most angle grinders.

KEY FEATURES

- M14 threaded fitment for use with Angle Grinders
