14	M4*25 screw	1

ASSEMBLY (fig.1)

- Place frame (item 4) over drum and secure using fixings (items 6, 7, & 8) placed on inside face.
- Place feet (item 9) over drum and secure using fixings (items 6, 7, & 8) placed on inside face.
- Screw handle knob (item 1) to handle (item 2).
- With spring (item 3) slid onto handle, pass handle shaft through the hole in frame (item 4).
- Locate handle shaft into sleeve on the Separator bar (item 13) and secure using fixings (items 10, 11, & 12)
- Pass end of handle shaft through the wire mesh.

- **INSTRUCTIONS**

- **DO NOT** fill the unit more than half full and **DO NOT** use materials that are too wet.
- When sifting soil / compost, place the unit either over a wheel barrow or the area where the sifted output is to be deposited.
- Rotate the handle and thus the separator bar, until all particles have been passed through the sieve.
- When weeding, place the weed clumps into the unit and rotate the separator bar back and forth to separate weeds from soil.

- **MAINTENANCE**

- Remove excess soil from unit when finished and wipe it down with damp cloth.
- Store in clean dry area.

Environment Protection

Recycle unwanted packaging materials. When this product is no longer required, or has reached the end of its useful life, please dispose of it in an environmentally friendly way. Drain any fluids (if applicable) into approved containers, in accordance with local regulations. It is our policy to continually improve products and we reserve the right to alter data, specifications and parts without prior notice. No liability is accepted for incorrect use of this product. Guarantee is 12 months from purchase date, proof of which is required for any claim.
