About the Product

Height-adjustable desk with 0°-40° tilting oak effect desktop ideal for your office or home needs. Features digital control panel with four programmable memory presets enabling you to reach your desired height with the push of a button. Features anti-collision for safety when used around children. Includes handy storage drawer to store your office or home essentials. Single motor system ensures a fast and stable adjustment. Features ultra-quiet operation with a sound level less than 50dB. Some simple assembly is required.

Specification

- Height range: 730-1230mm
- Tilt angle: 0 - 40°
- Speed: 25mm/s
- Desktop dimensions 1200 x 600mm
- Sound level <50dB
- Max. load capacity 50kg
- Supply 230v

Safety Instructions

• ELECTRICAL SAFETY

- **WARNING!** It is the user's responsibility to check the following:
 - Check all electrical equipment and appliances to ensure that they are safe before using.
 - Inspect power supply leads, plugs and all electrical connections for wear and damage.
 - Ensure that the insulation on all cables and on the appliance is safe before connecting it to the power supply.
- **DO NOT** use worn or damaged cables, plugs or connectors.
- Ensure that any faulty item is repaired or is replaced immediately by a qualified electrician.
- If the cable or plug is damaged during use, switch off the electricity supply and remove from use.
- **Ensure that repairs are carried out by a qualified electrician.**
- Dellonda recommend that an **RCD** (Residual Current Device) is used with all electrical products.
- **Important:** Ensure that the voltage rating on the appliance suits the power supply to be used and that the plug is fitted with the correct fuse.
- **DO NOT** pull or carry the appliance by the power cable.
- **DO NOT** pull the plug from the socket by the cable.

• GENERAL SAFETY

- Unplug the power source before cleaning. Wipe the dust on surface with slightly damp cloth when cleaning, **DO NOT** get water in the electrical housing, and be careful not to loosen any cables.
- Check carefully to ensure correct and complete assembly before use.
- Familiarise yourself with all functions and program settings of the product before first use.
- **DO NOT** let children play on the product.
- Slight noise caused by the V-ribbed belt or brake system will not have any effect on the use of the equipment.
- **DO NOT** clean the unit with corrosive or abrasive materials.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the

hazards involved. Children shall not play with the appliance.

- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or a similarly qualified person in order to avoid a hazard and prolong the life of the equipment.
- **ALWAYS** make sure there are no hazards in the operating environment. E.g., nothing that will get hooked up on the desk, or stop the desk from raising or lowering fully.
- Operating environment temperature 0-40°C.
- Keep the original instructions, for future reference.
- **ALWAYS** inspect the unit prior to use for fatigue and damage.
- Always be careful with the packaging materials in order to avoid any possible danger, e.g. plastic bag may lead to choking hazard to children.
- Keep the original packaging of the equipment if necessary in case of the future use in transportation.

Assembly

Step 1 Install the adjustable legs onto the desk frame

A x4
D 4x4

1 3

! Rotate the lifting column after inserting it to the end to avoid height difference. The long side of the lifting column is parallel to the short side of the table.

A D

1

Connect the lift column leg (3) to the table frame (1) and tighten the screws (A) with the hex key (D)

1 Insert

2

Insert the hexagon drive rod in the leg into the guide slot in the table frame

Once located rotate the column leg so that the base plate is hooked on the fixing bolts.

3

4

Tighten the eight screws (A) with 4mm hex key.

Step 2 Installing the desk feet.

B x8
D 4x4

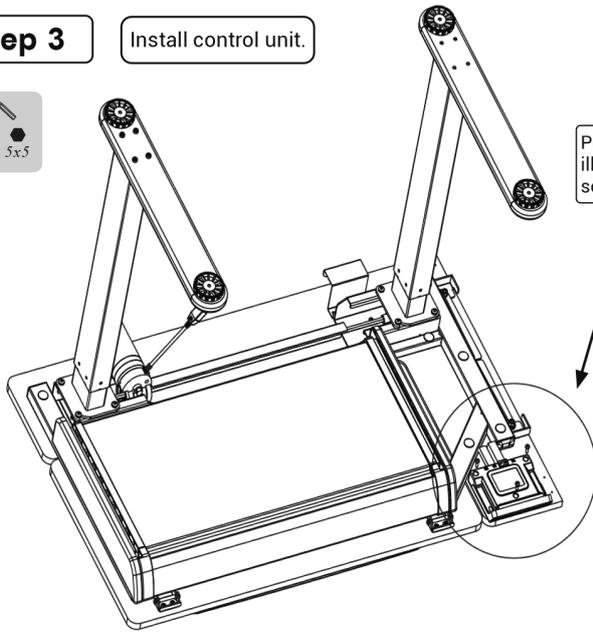

4 3

D B

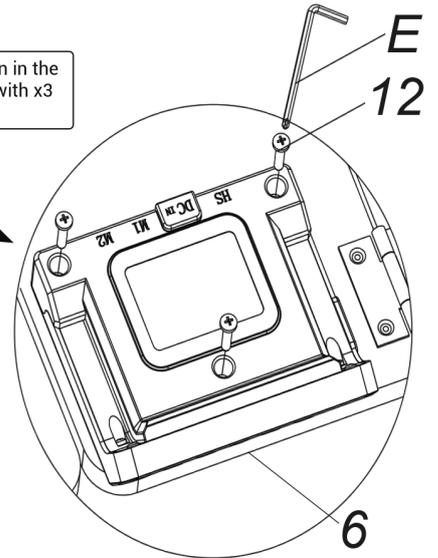

Orientate the feet (4) as shown in the illustration and tighten the screws (B) into the leg column (3) with the hex key (D).

Step 3

Power cable

Connect the in-line plug to motor

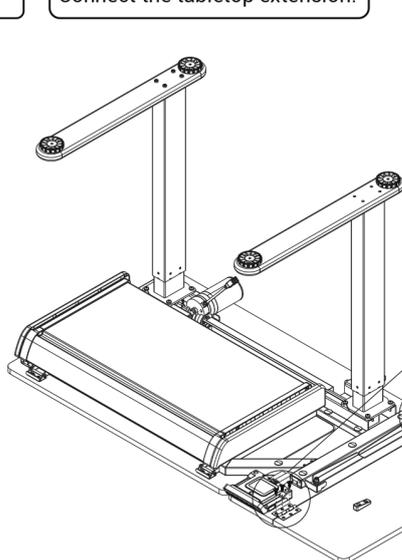

9

Tidy the cables with the adhesive cable tie.

Step 5

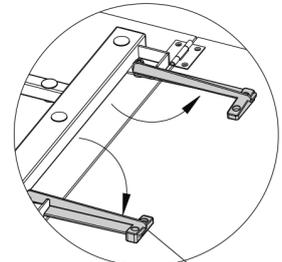

Connect the tabletop extension.

Lay the desktop extension (2) face down next to the desk as shown and screw in place with x6 screws (C).

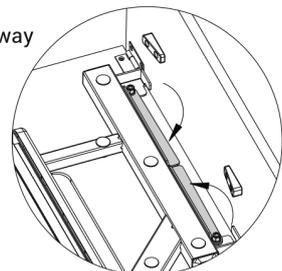

2

Unfold (a)

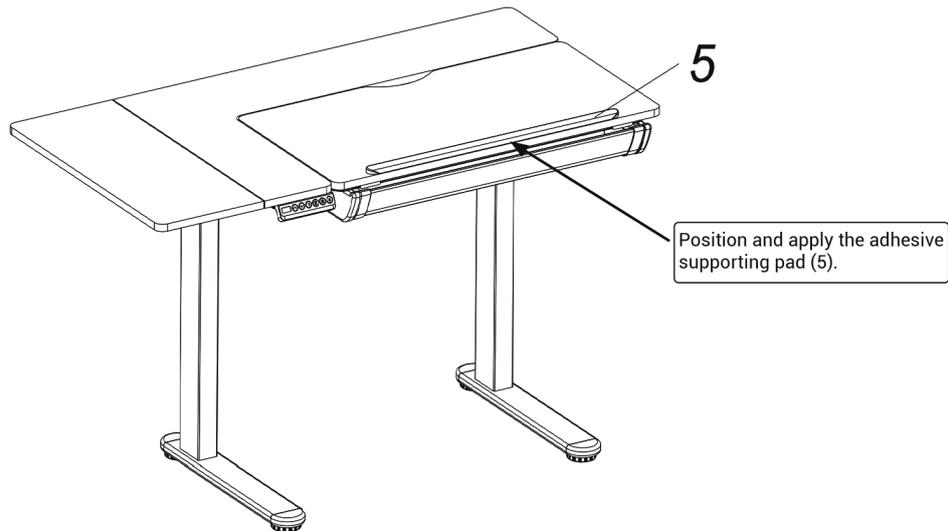

Support Rod

Fold away (b)

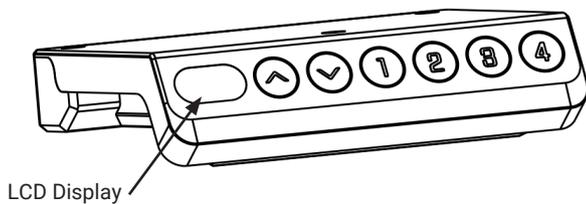

Step 6

Apply the supporting pad.

Operation

●	“▲”	Up button, adjust the desk upwards
●	“▼”	Down button, adjust the desk downwards
●	“1”	Position1, user's first stored height position
●	“2”	Position2, user's second stored height position
●	“3”	Position3, user's third stored height position
●	“4”	Position4, user's fourth stored height position

• Height Adjustment:

- 1. Press the “▲” button, the desk will rise, press and hold and the desk will continue to rise, the screen will show “top” when the desktop is at it's highest setting.
- 2. Press the “▼” button, the desk will descend, press and hold and the desk will continue to descend, the screen will show “bot” when the desktop is at it's lowest setting.

• Memory Presets:

- 1. When the desktop is stationary at your first desired height, press and hold the preset button “1” for 3 seconds, the desk will sound and the display will show “S-1”, this shows you have saved your 1st position preset height. Press the “1” preset button at any time to return to this height setting.
- 2. Repeat this process for presets “2”, “3” and “4” as explained in point 1 to your preferred height settings.

• Reset Operation:

- 1. When the height of the device is incorrect on the display or an error code appears, the device needs to be reset and corrected. Press and hold button “3” and button “4” simultaneously for 3 seconds to enter the reset function.
- 2. The display will show “RST”, long press the “▼” button to reset the control unit. When the desk descends to it's lowest height the desk will bounce upwards slightly and run until the display shows “bot” the reset will now be complete.

Adjust anti-collision sensitivity

- 1. Long press the “▲” and “▼” buttons simultaneously for the 3 seconds to change the sensitivity settings. There are 4 possible settings A-0, A-1, A-2 and A-3.
- 2. When the displays shows A-0 the desk anti collision setting is OFF, A-3 is High sensitivity, A-2 Medium sensitivity and A-1 for Low sensitivity. (factory default setting is A-2).
- 3. When the desk rises and descends it will rebound immediately when it encounters an obstacle.

• Troubleshooting

- **RESET:** When the LED displays “RST” press the down button until the desk reaches its lowest height and rebounds to stop. The reset has completed.
- When the desk does not work and the LED shows “E01” or “E02”, wait 18 minutes before trying to operate again.
- If the down button does not work, check the cable connections and then turn the power off for at least 10 seconds. Turn on the power and press the down button to start the **RESET** process when the LED displays “RST”.
- If none of the above processes work please contact Dellonda Customer Service.
